IWKA CPE Horizontal Intermittent Cartoner

IWKA CPE Horizontal Intermittent Cartoner

The CPE Cartoner packs single products into cartons. The machine's design allows it to work at a maximum productivity even when processing cartons with difficult geometrics, e.g. cartons with a square cross-section, oversized cartons and cartons made from non optimal materials such as recycles material.

The products are cycled through the machine and the number of cycles can be continuously adjusted . Depending on the product to be packed, up to 80 cartons per minute can be processed.

-Machine is fitted with a prefolded leaflet inserter

-Machine is fitted with a extended carton infeed system

-Cartoner will pack 80 cartons per minute depending on product and carton type

-Size range for cartons=

Carton width A dimension 20mm-75mm

Carton height B dimension 15mm-75mm

Carton length H With 3 Carton chains 55mm-180mm

Carton length H With 4 Carton chains 80mm-220mm

-Year of manufacture 1995

-Full Manuals available

-Very good condition

-Running when removed from production area
